

Global Strategy Minimum Set of Core Data and variables relevant to AMIS

(13 variables out of 41)

Group of variables	Key variables	Frequency
<i>Economic</i>		
- Output	1. Production	Annual
	2. Area harvested and planted	Annual
	3. Yield / Productivity	Annual
- Trade	4. Exports in quantity and value	Annual
	5. imports in quantity and value	Annual
- Stock of Resources	6. Land cover and use	i
	7. Economically active population	
	8. Livestock	
	9. Machinery	
- Inputs	10. Water	
	11. Fertilizers in quantity and value	
	12. Pesticides in quantity and value	
	13. Seeds in quantity and value	
	14. Feed in quantity and value	
Agro processing	15. Volume of core crops/livestock/fishery used in processing food	
	16. Value of output of processed food	
	17. Other uses (e.g. biofuels)	
Prices	18. Producer prices	
	19. Consumer prices	
Final expenditure	20. Government expenditure on agriculture and rural development	
	21. Private Investments	
	22. Household consumption	
Rural Infrastructure (Capital stock)	23. Irrigation/roads/railways/ communications	
International transfer	24. ODA for agriculture and rural development	
<i>Social</i>		
Demographics of urban and rural population	25. Sex	
	26. Age in completed years	
	27. Country of birth	
	28. Highest level of education completed	
	29. Labor status	
	30. Status in employment	
	31. Economic sector in employment	
	32. Occupation in employment	
	33. Total income of the household	
	34. Household composition	

Group of variables	Key variables	Frequency
	35. Number of family/hired workers on the holding	
	36. Housing conditions	
<i>Environmental</i>		
Land	37. Soil degradation	
Water	38. Pollution due to agriculture	
Air	39. Emissions due to agriculture	
<i>Geographic location</i>		
GIS coordinates	40. location of the statistical unit	
Degree of urbanization	41. Urban/Rural area
